

Addendum # 2 to the City of Westminster Fiber Optic Network Operator Project IT-265-C

Owner: City of Westminster
Consultant: CTC Technology & Energy

The City is building a municipal dark fiber-to-the-premises (FTTP) network, and seeks a Network Operator (Operator) who will lease the dark fiber, light the network, and make available capacity to Internet Service Providers (Service Providers) in an open, non-discriminatory fashion.

Questions received via pre-bid meeting and email from potential bidders.
Answers provided by the City staff and consultant:

Q1 Are any details available regarding the architecture of the phase I buildout / any specific hardware to be used?

A1.a *There are specs and engineering drawings for the project available for electronic download at <http://www.westminstermd.gov/documentcenter>*

A1.b *No specific hardware has been specified for the network operator role. Any hardware specific to the construction of the pilot project is contained in the specs previously mentioned.*

Q2 Can a network operator also be a service provider?

A2 *Yes, the network operator can be a service provider as well.*

Q3 On the call, it was mentioned that there is a market assessment/summary available; may we obtain a copy of this as well?

A3 *Yes, The feasibility study is available for download at <http://www.westminstermd.gov/documentcenter>.*
